

TOWER CRANE WIRELESS CAMERA SYSTEM

Close surveillance.. from the top

The need for Surveillance of construction operations going on at the top-floor of the site by the Project Manager / Architect / owner of any site is imperative.

However it becomes often difficult for the person to be physically present all the time.

MASSS offers you our all new special Wireless Camera system for TOWER Cranes.

These cameras now help you have a continuous view of what is happening at the top floor, without being physically present.

The Wireless system, ensures that as the Tower Crane "grows / jumps up", there is no need of extending the wiring etc to the camera.

Watch your construction even when you are not present at the top.

The Quality of the camera is just great at 1.3Mp (HD quality)

The PTZ (Pan Tilt & Zoom) ability of the same, helps you to move the camera as you desire, or to just let it keep rotating in a set fashion, even while you work hard at your desk.

The camera has a coverage range of almost 100 metres, which should comfortably cover the activities going on far below. *The IR facility, will offer you "night vision" too.

Signal undisturbed by temperature variations, Dust & humidity.

Wire free transmission of video feed from our transmitter to the receptor below

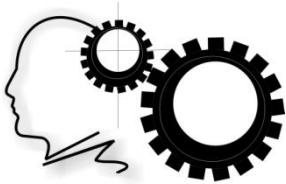

Down-time for installing the product is minimum.

Finally, the one year of free warranty on all parts (physical damage etc not included) and a solid post sales support, gives you a sense of security for your investment.

Masss

Masss is a 19yrs old company where Mr Christopher Fernandes is the proprietor.

Over the years, Masss has had the privilege of being associated with a number of leading customers; assisting them in their Sales efforts through Market Research, studies and meeting with prospective clients.

Our major customers include OTIS Elevators (last 19yrs and ongoing), besides Asian Paints, Jaguar and others.

We have presently a team of around 9 staff in Mumbai and 2 in Pune.

We believe that it is due to our constant desire to give of our best to our customers, in service and with integrity that has held us in good stead all these years.

With a strong background in Elevators, we specialize in the niche area of the all-new WIRELESS ELEVATOR CAMERA Systems.

We have recently completed the project at Hiranandani, Powai, Andheri successfully. It is a 30 storey building having 6 Mitsubishi elevators. The Chairman of the building happens to be a very eminent Architect, responsible for some very modern and highend projects in Mumbai.

Various other projects are in the pipeline.

We have also recently launched the WIRELESS TOWER CRANE Camera systems too.

With ample experience behind us, youthfulness to take on challenges and a sense of joy in undertaking our tasks; we feel certain that we could satisfy you with our integrity in all our dealings, our dedication to the task and our professionalism in achieving success .

Thank you for the interest in our service.

God bless.
